

Forensic Mental Health Professional Development Program

Improving knowledge, Improving practice

Workshops | August – December 2022

Centre for Forensic
Behavioural Science

Workshop 12

Management of people with personality disorders who have offended or pose a risk of offending

This training is aimed at practitioners working in community, justice and mental health settings who work with clients who are “challenging” or “complex”, including mental health, correctional, law enforcement and third sector professionals. It will provide practitioners with the theoretical and practical knowledge required to safely, ethically and effectively work with people with personality disorders who have offended or pose a risk of offending.

The morning will be focused on knowledge, covering: the challenges of working with this client group, useful theoretical frameworks to guide interventions, general principles of working with people with personality disorders, an overview of specific psychological treatments, offence-specific treatment for people with personality disorders, the role of psychopharmacological treatment, psychologically informed management, multi-disciplinary and multi-agency working, reflective practice and supervision.

The afternoon will be focused on practice and will use case studies to help participants consider how to work safely and effectively with people with different personality disorder traits and presentations..

Speakers:

- **Dr Raj Darjee** is a Consultant Forensic Psychiatrist and Senior Lecturer in Forensic Psychiatry at the Centre for Forensic Behavioural Science.
- **Ms Claudia Mulder** is a Principal Psychologist (Forensic & Clinical), Forensicare
- **Dr Aleksandra Belofastov** is the Director of Psychological Services, Forensicare

Date: 4 August 2022

Time: 9.00am – 4:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLWW>

Workshop 13

Assessment and treatment of offenders with cognitive disabilities

This training provides a summary of the current evidence base for risk assessment and treatment of offending behaviours of people with cognitive disabilities. By the completion of this training session, participants will have knowledge regarding the impact of cognitive disability on offending. Participants will also have knowledge regarding the validity and reliability of risk assessment measures for this population. Both cognitive behavioural and behavioural interventions will be explored, with a particular focus on the application of positive behaviour support and applied behaviour analysis. This full day session is appropriate for clinicians who work with people with a cognitive disability in the community or custodial settings.

Speaker:

- **Dr Matt Frize** is the Director, Forensic Disability & Secure Welfare Services.

Date: 22 August 2022

Time: 9.00am – 4:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLXF>

Workshop 14

Pharmacological treatment of paraphilic and paraphilia related disorder

This training will provide psychiatrists with the theoretical and practical knowledge required to assess and treat men with paraphilic and paraphilia-related disorders who may benefit from treatment with sex drive reducing medication.

The training will cover:

- the biology of male sexual behaviour;
- paraphilic disorders and compulsive sexual behaviours;
- the medications available;
- the evidence base for psychopharmacological treatment;
- treatment guidelines;
- clinical assessment and treatment;
- relevant investigations and monitoring
- integrating treatment with other aspects of management;
- relevant legal and ethical issues.

This training is primarily aimed at psychiatrists who work in community, justice and hospital settings where sexual behavioural problems or people who pose a risk of sexual offending are encountered. It may also be of interest to other medical practitioners or non-medical professionals who work with these client groups, particularly if they work with men who are on relevant medications.

Speakers:

- **Dr Raj Darjee** is a Consultant Forensic Psychiatrist and Senior Lecturer in Forensic Psychiatry at the Centre for Forensic Behavioural Science.
- **Dr Danny Sullivan** is the Executive Director of Clinical Services at Forensicare.

Date: 23 September 2022

Time: 9.30am – 4:30pm

Place: Online

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLYM>

Workshop 15

Working with families and carers in forensic mental health

Using contemporary knowledge and interactive case studies, this training will provide individuals with the fundamental skills to effectively engage and support families and carers of consumers in secure and non-secure mental health settings. Common service challenges and barriers to engagement will be explored, and strategies to address these will be provided.

At the completion of this workshop, participants should develop an understanding of the strategies and skills needed to initially engage with families, and meet their educational and support needs. Participants should also feel more comfortable navigating privacy and confidentiality challenges and understand how to involve families and carers in case planning. Finally, participants will learn skills to develop a more culturally sensitive practice.

This 2-hour workshop is designed for clinicians working with families and carers in forensic mental health or justice-involved mental health settings.

Speakers:

- **Ms Claudia Brophy-Ogders** is a Social Worker, Forensicare
- **Mr Grant Burkitt** is a Lead Social Worker, Forensicare
- **Ms Shelley Turner** is the Chief Social Worker, Forensicare

Date: 30 September 2022

Time: 9:30-11:30

Place: The Paul Mullen Centre
505 Hoddle Street, Clifton Hill

Cost: \$50 (+GST)

Book: <https://www.trybooking.com/BZQEE>

Workshop 16

Working with complexity

This full day workshop offers the opportunity for case managers and therapists to enhance their knowledge and skills in the engagement and management of clients who present with complex needs, who are often mandated to engage with services. The clients that will be discussed are those who: have co-morbid health and mental health disorders, are reluctant to engage, pose risks to either themselves or others, have multi service involvement, and have been mandated for treatment by either civil or criminal justice orders. We will explore contemporary evidence-based practices regarding, the links between mental illness and offending, balancing risk mitigation and client recovery and client centred approaches to risk management. The ethical dilemmas and challenges of client confidentiality, particularly when communicating identified risks with other services will also be discussed. This will be an interactive session using case studies and there will be opportunities to reflect upon practice.

This session is suitable for experienced workers in both the government and non-government sectors and in the fields of mental health, disability, drug and alcohol, child protection and corrections.

Speakers:

- **Mr Mark Megalla** is a Senior Accredited Mental Health Social Worker who works on Forensicare's court based Mental Health Assessment & Referral Service (MHARS).
- **Ms Danielle Ashley** is an Occupational Therapy Educator and the Allied Health Graduate & Psychology Registrar Program Project Lead at Forensicare.

Date: 21 October 2022

Time: 9:30-4:00

Place: The Paul Mullen Centre
505 Hoddle Street, Clifton Hill

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLYR>

Workshop 17

Planning and delivering effective forensic group programs

This two-day training covers theoretical, evidence-based and practical aspects of planning, implementing and delivering group programs to justice-involved individuals. At the completion of the training, participants will understand the theory and evidence-base underpinning forensic group interventions, the key considerations for effectively planning and running groups in the forensic context, and the core skills required to facilitate change in the group therapy environment. The training will be interactive and involve experiential reflective and practical exercises designed to build effective group facilitation skills. This two-day training is suitable for clinicians involved or interested in the delivery of group programs within forensic mental health or correctional settings.

Speakers:

- **Dr Flora Gilbert** is a Clinical and Forensic Psychologist. She is the Principal Psychology Educator, Forensicare.
- **Dr Marie Henshaw** is a Clinical and Forensic Psychologist and Research Fellow at the Centre for Forensic Behavioural Science.

Date: 27-28 October 2022

Time: 9.00am – 4:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$750 (+GST)

Book: <https://www.trybooking.com/BZTFU>

Workshop 18

Formulation of complex and potentially harmful behaviour

One of the most challenging aspects of working in forensic contexts is responding to behaviours that have the potential to cause significant harm (e.g., violence, threats, harmful sexual behaviour, stalking). To work effectively with such clients, professionals need to be able to formulate the client's behaviour; i.e. understand and explain the behaviour and harm potential, and use this knowledge to guide risk management and intervention. Formulation of problem behaviour is particularly important in cases where there are multiple interacting comorbidities and co-occurring biopsychosocial challenges; in client groups with whom it can be difficult to establish a rapport; and in cases where there is a high risk of inconsistent management across agencies and over time.

The aim of this workshop is to teach a method of formulating problematic and potentially harmful client behaviour that goes beyond the application of structured risk assessment guides. The workshop will involve both didactic learning and case study-based practice.

Participants will finish the workshop with a framework for formulation that they can use to understand and communicate about concerning client behaviour, and to shape risk reduction and intervention efforts. This workshop is intended for health and human services professionals who are keen to build their ability to work with clients who present with problematic and potentially harmful behaviour towards others.

Speaker:

A/Professor Troy McEwan is an Associate Professor at the Centre for Forensic Behavioural Science, and a Senior Psychologist with Forensicare's Problem Behaviour Program. She also convenes the Doctorate of Psychology (Clinical and Forensic) training program and the Graduate Diploma of Forensic Psychology at Swinburne University of Technology.

Date: 09 November 2022

Time: 10.30am – 4:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLYZ>

Workshop 19

Instilling trauma-informed care when working with justice-involved clients

This training provides an overview of trauma-informed care and considers opportunities for instilling trauma-informed care and practice within services working with justice-involved clients. At the completion of this training, participants should have an understanding of the ethos, principles, and research underlying trauma-informed care, and practical approaches to enlivening trauma-informed care in their workplace. As part of this, participants will be invited to undertake personal reflection about their approaches towards clients, colleagues, and self-care. This full-day training is suitable for clinicians working with justice-involved clients, whether in community, inpatient, or custodial settings. This training is also suitable for those who manage or supervise clinicians in such client-facing roles.

Speaker:

► **Dr Bonnie Albrecht** is a Senior Psychologist with the Problem Behaviour Program, Forensicare and a Clinical Associate, Centre for Forensic Behavioural Science. Bonnie has been actively involved in trauma-informed care initiatives at Thomas Embling Hospital and the Problem Behaviour Program.

Date: 11 November 2022

Time: 9.00am – 4:30pm

Place: The Paul Mullen Centre
505 Hoddle Street, Clifton Hill

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZRBA>

Workshop 20

Working with young people who display sexually inappropriate behaviours

Young people account for a significant proportion of instances of sexual abuse, particularly against children or younger siblings. This workshop will focus on key issues and the needs of young people who engage in sexually abusive behaviours. An overview of the nature and extent of the problem and a framework for screening and assessment will be presented. The workshop will provide practical advice on case formulation and intervention planning, including discussion of therapeutic responses to problematic sexual behaviours among children and adolescents. Furthermore, we will draw on understandings of the vulnerability and contextual factors of sexual abuse to enhance protective planning and therapeutic care.

This half-day workshop will be suitable for those working in or interested in youth focused services.

Speakers:

► **Dr Stefan Luebbers** is a Principal Psychologist with the Youth Forensic Specialist Service / Parkville Youth Justice Centre and an Adjunct Lecturer at the Centre for Forensic Behavioural Science

► **Dr Nina Papalia** is a Clinical and Forensic Psychologist, Senior Research Fellow with the Centre for Forensic Behavioural Science and Fullbright Scholar.

Date: 29 November 2022

Time: 09:00am – 12:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$175 (+GST)

Book: <https://www.trybooking.com/BZLZH>

Workshop 21

Working with people who commit sexual offences

Fear, hatred, disgust and banishment dominate societal discourse about those who commit sexual offences. Legal measures to control the risk posed by sexual offenders are expanding. In this context, it is important that practitioners and services understand the research evidence base and best practice in the assessment, treatment and management of those who sexually offend.

This full-day workshop will give attendees an up-to-date detailed and evidence based overview of: the nature and prevalence of sexual offending; theoretical models of sexual offending; the relationship between sexual offending and mental disorders; risk factors, protective factors and risk assessment; managing sexual offenders; pharmacological treatment; psychological treatment; and, online sexual offending.

It is suitable for practitioners from mental health, correctional, police or legal backgrounds who want to develop their knowledge of sexual offenders.

Speakers:

► **Dr Raj Darjee** is a Consultant Forensic Psychiatrist and Senior Lecturer in Forensic Psychiatry at the Centre for Forensic Behavioural Science.

► **Dr Marie Henshaw** is a Clinical and Forensic Psychologist at Forensicare and senior research fellow at the Centre for Forensic Behavioural Science.

Date: 09 December 2022

Time: 09:00am – 4:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington

Cost: \$375 (+GST)

Book: <https://www.trybooking.com/BZLZU>

Workshop 22

Involuntary celibates: Sexlessness, singledom and revenge

Involuntary celibates ('Incels') refers to an online hate subculture of male supremacists that continues to evolve, gaining internet popularity. This training aims to raise awareness of this growing phenomenon and its damaging impacts, including mass violence. The training should enable practitioners to recognise factors that predispose to this extremist ideology, characteristics of adherents and their communications, and intervention options for vulnerable individuals.

The training is recommended for all mental health practitioners in general, forensic, adult and youth sectors, as well as professionals in justice, tertiary education and law enforcement settings.

Speaker:

► **Professor Michele Pathé** was previously a Consultant Forensic Psychiatrist with Forensicare and a Professor at the Centre for Forensic Behavioural Science. She was instrumental in establishing the Queensland and Victorian Fixated Threat Assessment Centres and has played a key role in developing Australia's policy responses to lone actor grievance-fuelled violence.

Date: 15 December 2022

Time: 6:00pm-7:30pm

Place: Centre for Forensic Behavioural Science
Level 1, 582 Heidelberg Road, Alphington
or
Online

Cost: \$50 (+GST)

Book: <https://www.trybooking.com/BZLZP>

Registration forms

Please register and pay online at:
www.forensicare.vic.gov.au/training

Cancellation policy

We reserve the right to cancel workshops, in which case all fees will be refunded.

If participants withdraw up to 72 hours prior to the commencement of the workshop, then 50% of the fee will be refunded.

There will be no refunds for cancellations within 72 hours of the workshop.

Bookings are non-transferable to future workshops, but bookings for a particular workshop can be transferred to other persons.

Enquiries

We provide tailored training for organisations and agencies. To discuss any specific training needs and requests, please contact:
